Road transport

Air freight forwarding and cargo charters

Project Cargo (relocation of factories and production lines)

Military transports

International rail freight services

Transportation of refrigerated food products

Temperature-controlled transport of medicines

Contract logistics

Consulting and logistics audits

# Air freight forwarding

- IATA Agent
- Global operations - door-to-door services
- Types of transport:
  - consolidation service
  - economic service
  - priority service
  - aircraft charters
- Controlled temperature - food and pharmaceutical industry
- DGR type dangerous goods

# Spedycja morska

Comprehensive forwarding support of any full container loads (FCL) and containerized general cargo (LCL) in global scope:

- sea freight for neutral cargoes or dangerous (IMO) at controlled temperature (reefer type containers) and without it (ordinary containers i.e. DV, HC, OT in contour),
- container consolidation / deconsolidation and warehouse logistics,
- customs clearance,
- transport risk insurance,
- regular cooperation with licensed agents in most countries of the world and a large volume of freight from shipowners.

# Road transport and freight forwarding

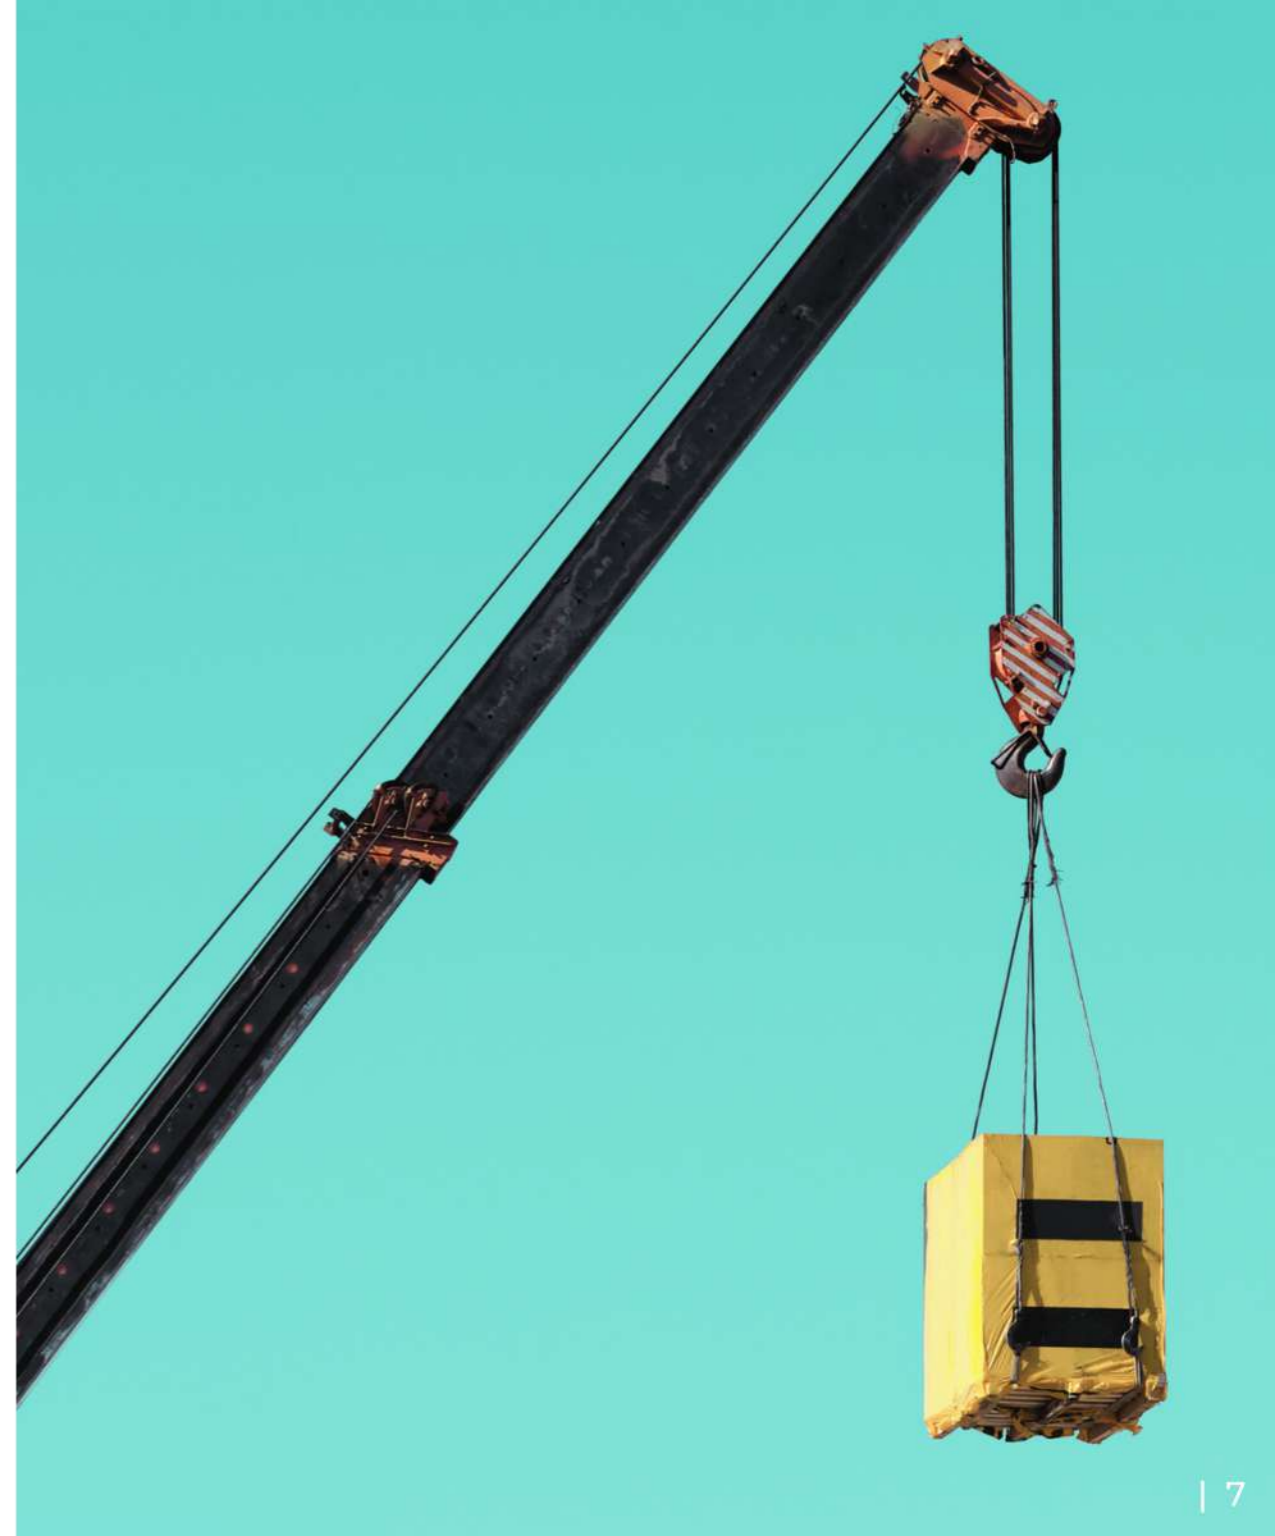

- Own fleet and contract carriers:
  - refrigerated trucks
  - tarpaulin-covered trucks
  - tipper trucks
- National and international transport.
- Controlled temperature transport.
- ADR transport of goods.

# Project Cargo

Comprehensive road / sea / river / rail / air service of heavy and / or oversized cargo as well as any cargo that requires individual (so-called project approach), in Poland and worldwide, along with added services:

- Partial and full charters of Break Bulk / RORO ships.
- Container transport using specialized equipment (Flat Rack and Open Top container types).
- River transport (barges and pontoons).
- Rail transport for loads exceeding the gauge.
- Road transport (carriage, detours, piloting, expert opinions, assembly and disassembly of infrastructure).
- Partial and full charters for air transport.

# Railroad logistics

- Organization of domestic and international rail transport
- Organization of handling and storage services (own terminals)
- Customs support (import, export, transit)
- Preparation and control of shipping documents
- Provision of standard gauge (1435 mm) wagons and broad gauge (1520 mm) wagons

# Contract logistics

- The warehouses we have are located in areas with infrastructure:
  - port areas
  - railway sidings (wide and normal gauge)
  - national roads and motorways
- These are places recognized for customs clearance
- They enable handling, packing, assembling and distribution.
- On their territory can be stored any industrial goods.

# COMPETITIVE ADVANTAGES

## RANGE OF SERVICES

We offer a wide range of services, such as expanding our offering to include additional logistics services like warehousing or order fulfillment. We are flexible in our operations!

## SERVICE QUALITY

We offer services of the highest quality, for example, through investments in employee training and technologies that enable us to provide better customer service.

## PRICE

We offer competitive prices, which allows us to enhance our market advantage.

## INNOVATION

We invest in the development of new technologies and customer service methods, which enhances our competitive advantage in the market.

# CERTIFICATIONS

Quality certified - we hold the largest number of certificates among companies in the TSL sector.
